

FOR THE ATTENTION OF
THE HEATING DEPARTMENT
Please pass on to the appropriate staff
members, thank you.

Welcome to 2010.

It is pleasing to report that **YUNCA** has again had a great start to the heating season. Home shows in the deep South, and sales trips to date in the South Island have been very positive in outlook, with the movement back to solid fuel burners building on last years trend.

The price of power has risen 5% in many areas, making the pay-as-you-go option of solid fuel very attractive. In many areas older fires are being replaced with clean air wood burners.

REMEMBER – YUNCA FOR DURABILITY AND RELIABILITY!

At **YUNCA** we have always made fires to last the distance, take a look at what makes **YUNCA** a great option when choosing a new fire:

- ❖ The 5mm firebox is **fully lined** with individual **40mm fire bricks**, providing low cost, long lasting protection.
- ❖ The combustion plate for a Wegj and a Blenz is a **steel frame** holding the same 40mm fire bricks that protect the firebox.
- ❖ The combustion plate for a Hobson and a Fitzroy is long lasting **steel plate** (and has been used on this range of product for over 17 years).
- ❖ Hobson, Fitzroy and Blenz feature a **strong cast door frame** to prevent warping.
- ❖ The flue spigot is **8mm thick steel** for increased durability.
- ❖ The **enamel finish on panels** will not fade, wear or discolour over time. Easy to clean, and we have enamel colour options too.

**YUNCA CLEAN AIR APPROVED WOODBURNERS
FEATURE A 10 YEAR WARRANTY ON THE FIREBOX.**
(i.e. Wegj 2000 CA 0.8g, Hobson CA 1.0g, Fitzroy CA 0.9g)

March 2010

YUNCA WARRANTY

YUNCA solid fuel and gas fires are proudly made in the deep south of New Zealand and have been subject to a comprehensive research and development programme.

All critical components and air flow controls have been rigorously tested for safety and peak efficiency.

YUNCA heaters are warranted, with proof of purchase, to the first owner of each appliance for a period of 12 months, commencing on date of delivery of the appliance in new and unused state.

Repair or replacement is at YUNCA's discretion and includes associated labour costs but excludes freight and travel costs.

This warranty does not cover damage caused by mishandling, misuse, failure to follow the manufacturer's installation and operating instructions, or work done by others, such as installers, or plumbers etc.

The manufacturer shall not be responsible for site conditions such as insufficient draught, downdraughts, or routine servicing and adjustments.

All consumables (e.g seals) and replaceable parts (e.g grates) gas and electrical components are warranted for a period of 12 months from the date of purchase.

If a defect occurs, inform your dealer and the part will be repaired or replaced at our option.

EXTENDED FIREBOX WARRANTY – following the initial 12 month warranty the firebox continues to be covered as follows:

YUNCA CLEAN-AIR WOODBURNER FIREBOX: is covered by a further NINE YEAR warranty against defects during normal domestic use.

YUNCA MULTIFUEL FIRE and YUNCA GAS HEATER FIREBOX: is covered by a further FOUR YEAR warranty against defects during normal domestic use.

During the extended warranty period YUNCA will repair or replace, free of charge, any part of the firebox requiring repair or replacement as a result of defective material or workmanship in manufacture and/or assembly.

[Please refer to the operating and warranty instructions for full details on individual fires.](#)

YUNCA HEATING

The YUNCA Group is wholly New Zealand owned and operated and is based in Invercargill. Established in 1977 by Terry Young under the philosophy "quality first", the Group has continued to expand. The design, manufacture and distribution of a range of domestic, solid fuel and gas-fired heating appliances has been a core activity for over 28 years.

PANEL FINISH & COLOUR RANGE

Solid fuel fires, Freestanding Gas fires: YUNCA uses a vitreous enamel finish for panel colours which withstand extreme heat and will not deteriorate over time. Standard enamel colours across the range of fires produced by YUNCA are Gunmetal Black and Charcoal. The exceptions for this are the Hobson and Fitzroy woodburners - Charcoal is a premium (non-standard) colour. All other colours (shown in the product brochure) are optional for certain models at an additional cost. Please allow 4 - 6 weeks from time of order to delivery for these non-standard colour options.

Allure range fascia panels are finished in heat resistant powdercoat. The Allure Gas open fire colour range is available in Silver (for indoor only) or Gunmetal Black. Stainless Steel option is now available for both indoor and outdoor Allure gas open fires (730 and 930 models only).

APPROVED CLEARANCES AND CLEAN AIR APPROVALS SOLID FUEL

All YUNCA solid fuel fires shown on this website (with the exception of the Inbuilt Multi) have been tested and clearance approved to comply with AS/NZS 2918:2001. All models (the exception of the multi-fuel BLENZ and MULTI INBUILT models) have been tested and approved to comply with the clean air requirements of AS/NZS 4013:1999 sub 1.5g/kg particulates and 65% thermal efficiency or better, to meet national clean air standards.
