

Sustainability

Congratulations

By becoming part of the Yunca family you are doing your bit for the environment. We believe sustainability starts with quality and by purchasing a Yunca you are likely to have generations being warmed by this very wood burner.

OUR PLANT A TREE PROMISE

We don't just ensure a quality, recyclable product we are also doing what we can to support air quality and our environment.

For every Yunca heater sold, we purchase a seedling to be planted by a sustainable firewood producer based in New Zealand.

CARBON NEUTRAL HOME HEATING

Yunca Wood Burners offer a low-carbon, sustainable alternative to heating your home.

Burning firewood releases no more greenhouse gases than would be produced by leaving wood to rot on the forest floor.

If you source your wood locally from a sustainable firewood producer, using your efficient Yunca heater is almost carbon neutral.

BREATHING NEW LIFE

Your Yunca Heater has a long life expectancy. We take pride in manufacturing every element ourselves because we value quality and know that product longevity is critical for any sustainable business.

When the time does come to say goodbye, your heater is not destined for landfill*. Almost every part can be recycled, upcycled or given a second lease of life as a reconditioned used heater.

**Your retailer can assist you to recycle your Yunca heater.*

Steel

Is almost 100% recyclable and can be melted down and reused to make things such as railway tracks and BBQ plates.

Glass

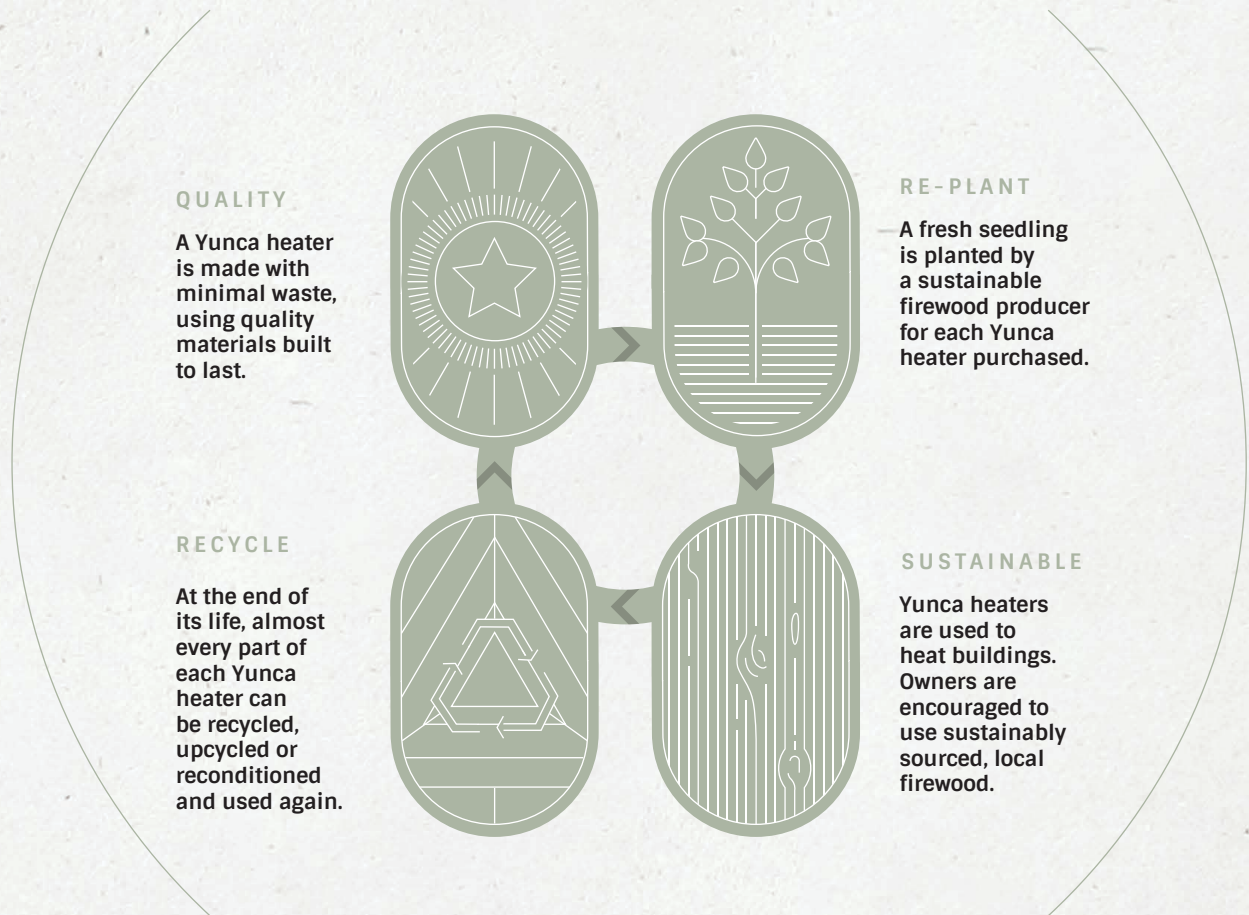

Can be crushed back into sand and re-purposed to assist in the making of new roads and for industrial processes.

Bricks

Your fire bricks are mostly made of clay which can be repurposed to make building and landscaping supplies.

CIRCULAR ECONOMY

We are reducing pressure on the environment by enabling a *'circular economy'* where materials are reused or upcycled where possible and quality products are used for longer.

“ We are a family company; proud of what we do and how we do it. We strive to be custodians of our environment so it is important to us that sustainable heating is at the very heart of our business. That’s why we are committed to our plant a tree promise – one tree goes into the ground for every Yunca Heater purchased. Supporting sustainable firewood is the right thing to do and we’re fully committed to doing our bit.
